

Inland Seas Education Assoc.

Boat Building Program

Inland Seas mission is Inspiring Great Lakes curiosity, stewardship, and passion. This is done through a myriad of programs but primarily with stem-based on-board education of elementary students on our traditionally rigged schooner.

The boat building program has the same ultimate mission but targets a potentially different group of kids by offering wooden boat building classes for students aged 8 and up. The different classes are a work in progress, but start with an opti pram and get progressively more in depth and challenging as the students get older. I developed the line of Skin-on-frame SUPs as projects for middle school students and continued to refine them as it became obvious that they were working well as projects for us.
