

## Center of Applied Technology – South, AACPS

### *Marine Service Technology Program*

We are a Career and Technical Education center serving the southern half of Anne Arundel County around Annapolis, Maryland. Five different high schools send students to our programs to learn trades in fourteen different disciplines.

The Marine Service Technology Program teaches boat building, outboard, inboard and diesel maintenance and troubleshooting, marine electrical wiring, composites and fiberglass repair, boat carpentry, marine finishes, customer service skills and hull design theory.

A Career Exploration offering allows freshman to try different programs in the school. Students that choose to pursue the Marine program, then return for a year-long Level One course and a year-long Level Two course in which they will build a boat and become familiar with marine systems. Current projects include construction of a 23' cold molded motor launch and restoration of a 34' wooden ketch.

	Adults	Youth
Number of Participants	0	20
Number Achieving Program Goal		99%

Size of Budget	Variable
Number of Employees	1
Number of Volunteers	1
Boat Designs You Build	Bevin's Skiff Custom CLC boat Bevin's Models
Boat Designs You Use	Bevin's Skiff
