

# Building To Teach

## *Hands-On Math Instructor Training*

Building To Teach enables students to learn math through hands-on projects: opening the door to higher education and better jobs.

Our Vision:

- Reintroduce the building process as a teaching tool
- Use and train undervalued and underutilized networks of math instructors
- Build an engaged community of trainers, instructors, volunteer tutor/mentors and students
- Help change the way math is taught in America in order to excite young people about math, improve their math proficiency and prepare them for jobs that use math.

### **Program Statistics (Annual):**

	Adults	Youth
