

## Arlington County Public School (Virginia)

### Kenmore Middle School

I am a 6-8<sup>th</sup> grade technology education teacher. Over the years my students built model and full size Bevin's skiffs. I've used the Building to Teach materials to teach a 6<sup>th</sup> grade math remediation class with the model Bevin's as the culminating project. This school year my students built cigar box guitars using the Building to Teach building guide. I am thankful for the collaboration from the other teachers using the materials to make my students more successful.
