

Tidewater Wooden Boat Workshop

Youth Boat Building Program

Tidewater Wooden Boat Workshop uses wooden boat building and other nautical-related activities to teach math, science and essential life skills to disadvantaged youth in the Hampton Roads area of Virginia.

Activities included in this program are boat building, rowing, and environmental science projects. We have also built cigar box guitars and this coming summer will build Sea Perch ROVs. We recently started an adult boat building course. Future planned activities include sailing, fishing and rowing “expeditions” with our students.

Program Statistics (Annually):

	Adults	Youth
Number of Participants	8	175
Number Achieving Program Goal	8	175

Size of Budget	\$ 242,000
Number of Employees	2 currently; will expand to 4 in near future
