

Mark Reuten, Nomad Boatbuilding

Traditional Watercraft Skills Preservation

Through my company, Nomad Boatbuilding, I primarily focus on building small watercraft of both modern and traditional construction. I offer courses to individuals and groups through my own workspace, our local community college and in Arctic communities within Canada.

One of my areas of specialty is traditional skin-on-frame kayaks. Working with community elders and youth, I help regenerate traditional kayak-construction techniques indigenous to a particular geographic area and introduce modern alternatives.

I have been in business since 1999.

Program Statistics (Annually):

Number of Participants	12
Number Achieving Program Goal	No specific goals
Size of Budget	None
Number of Employees	None
Number of Volunteers	None
