

National Sailing Hall of Fame

The National Sailing Hall of Fame is a 501(c)(3) non-profit educational institution dedicated to preserving the history of sailing and its impact on our culture, honoring those who have made outstanding contributions to American sailing, teaching math, science and American history, inspiring and encouraging sailing development and providing a landmark for sailing enthusiasts.

Learning Math & Science Through Sailing National Consortium

The Learning Math & Science Through Sailing Initiative is a significant part of the National Sailing Hall of Fame's mission to engage sailing's next generation. In addition, we believe the Learning Math & Science Through Sailing Initiative will make an important contribution to the national STEM (Science, Technology, Engineering & Math) program, thereby enhancing the future research, engineering and high-tech U.S. workforce.

In our Consortium, Educators from all around the country can collaborate - virtually and in person - with Scientists, Engineers, Sailing/Marine Industry Professionals and each other to discover, develop and implement new ways to use sailing as a vehicle to teach lessons and skills that relate directly to core curriculum goals.

How Educators are Using Sailing To Teach Math & Science

From partnerships with local schools, to after-school programs that engage troubled youth, and much more. This is where we provide case studies, weblinks and other resources to give educators ideas, plans and connections to use the Sailing community to help them achieve their Math & Science learning objectives.

LEARNING AMERICAN HISTORY THROUGH SAILING

The history of the United States is intricately interwoven with sailing history. The Learning American History Through Sailing Initiative will demonstrate the crucial connection between sailing and the growth of American culture, economy and nationalism.
