

Maritime Professional Training

Maritime Professional Training's Mission is to provide access to high-quality, noteworthy maritime career training programs that maximize student learning and success, develop a globally competitive maritime workforce and to respond rapidly to a diversity of state and community needs. Hands-on STEM learning in High School classes while building small boats stimulates career interests in the maritime industry. MPT provides the training these future mariners need to meet our nation's demand for a skilled maritime workforce. MPT's community outreach includes: Mentoring students who build small boats (in a local two-day Plywood Regatta competition), Office of Naval Research's regional Sea Perch ROV competition, Florida Career & Technical Education's high school Maritime Technology certification courses, and scholarships for young Hawsepipers to Sail/Train on the US Brig Niagara.
